Epoxydharz L

Epoxy resin L

Ⓓ Düninflüssiges, lösemittel- und füllstoff-freies Laminierharz zum Tränken von Glas-, Aramid- und Kohlenstofffasern. Verarbeitung mit den Härtern S, L, EPH 161 und EPH 500.

Die Festigkeitswerte entsprechen weitgehend der deutschen Luftfahrtnorm für den Bau von Motor- und Segelflugzeugen. Eine Zulassung ist nicht gegeben.

Durch die niedrige Oberflächenspannung zeigt das System eine gute Füllstoffaufnahme.

Verstärkungsfasern werden sehr gut benetzt. Epoxydharz L eignet sich hervorragend zum Verkleben der gebräuchlichsten Materialien wie z.B. Holz, Schaumstoffe (Styropor®) sowie der meisten Kunststoffe und Metalle.

Das System kann auch zur Herstellung von Gießlingen und zum Vergießen elektronischer Bauteile verwendet werden (Wärmeentwicklung berücksichtigen!).

Lagerung: Dunkel und über 15° C

Bestell-Nr.: 100 135-1

Inhalt: 5 kg

UN 3082

Ⓔ Liquid, solvent-free, filler-free laminating resin for impregnating glass, aramide and carbon fibers. To be processed with the hardeners S, L, EPH 161 & EPH 500

The mechanical strength properties meet the German aviation standards to a great extent for constructing motorized airplanes and gliders. There is no authorization.

The system displays good filler acceptance via its low surface tension. Reinforcing fibers are well moistened.

Epoxy Resin L is excellently suited for bonding the most common of materials such as wood, foam materials (Styrofoam) and most plastics and metals.

The system can also be used to manufacture castings and for encapsulating electronic components (take heat generation into consideration!).

Storage: dark and at more than 15° C
